

Making Blinds Even Safer

There are several ways in which the small but potential dangers of free hanging blind cords can be reduced. Below we show the options which Eclipse Blind Systems offer to its customers. They are typical of the solutions available throughout the trade.

Cord Safety	SAFETY FEATURES	CORD CLEAT	CORD SECURING CLIP	CHAIN TASSEL	CORD STOP
		 <p>Can be used with Vertical, Venetian, Roller, Pleated and Roman blinds. This simple device is attached high onto an adjacent wall. The cords can then be completely wound round it, out of a child's reach.</p> <p>Suitable for: Vertical • Venetian Roller • Pleated Roman</p>	 <p>This 'P-shaped' clip can be used with Vertical, Roller and Roman blinds. Mount it onto an adjacent wall and secure the cord/chain so that the loop cannot be easily reached.</p> <p>Suitable for: Vertical • Roller Roman</p>	 <p>For use with Vertical, Roller, Venetian and Roman blinds. You can eliminate the chain loop by using a single length of chain with tassels attached to each end.</p> <p>Suitable for: Vertical • Venetian Roller • Roman</p>	 <p>Specifically for Venetian blinds, the cord stop is attached at the top of the control cord. Should undue pressure be placed on the cord running through the slats, the control cord will not feed back through the headrail to form a loop.</p> <p>Suitable for: Venetian</p>

BREAKAWAY TASSEL	MONO CONTROL	ULTRA WAND	CHAINLESS VANES	INTU PLEATED AND VENETIAN
 <p>Primarily suited to Venetian blinds, the tassel will break apart if put under any undue pressure. Two separate cords mean that there is no potentially hazardous loop.</p> <p>Suitable for: Venetian</p>	 <p>Mono control is a key safety feature of Vertical blinds. The chain and cord, used to rotate the vanes and open and close the blind, are replaced by a single rod.</p> <p>Suitable for: Vertical</p>	 <p>Ultra wand combines tilting and raising/lowering of the Venetian blind into one control. When the blind is raised, lift cords can be wrapped around the cleats attached to the wand, eliminating free-hanging cords.</p> <p>Suitable for: Venetian</p>	 <p>You can request sewn-in bottom weights on your Vertical blind, eliminating the need for potentially hazardous bottom chains. Chainless vanes are a standard feature of PVC Vertical and SoftSheer blinds.</p> <p>Suitable for: Vertical</p>	 <p>INTU blinds are specially designed without hanging cords so are particularly child safe.</p> <p>Suitable for: Venetian • Pleated</p>
