

# Enhance your lifestyle

Solutions for garage doors & gates by Somfy

HOME  
MOTION BY

somfy®

Imagine.....

.....a single control for your gates, garage door & lights!

By day and by night, in the rain or wind, imagine the comfort of being able to open and close your garden gates and garage door from inside your car!

Comfort and time saving but also security and safety as you do not block the street and no-one is left standing in the roadway. Additional benefits are that doors can be programmed to close automatically so you don't have to worry about them and lighting which comes on automatically in the garden.

The starting point is quite simply a Somfy motor you can install on every kind of existing door and gate!

# Comfort and convenience ... at the touch of a button

## CONVENIENCE

It all happens in a matter of seconds!

You will hardly have time to cross your garden or prepare yourself for a drive before the gate has opened.

Due to the impressive range of \*Radio Technology Somfy™, you can open the gates or garage door well before you have entered the drive!

\*Radio Technology Somfy™ (RTS) has a transmission range of 200m in free space or 20m through 2 concrete walls.

## SAFETY

Somfy systems are safe!

Your Somfy motor has a very sensitive and intelligent electronic system which will detect the slightest obstacle, and stop and reverse your garage door or gates.

No risk at all for children who play near the garage to catch a ball or play on their bicycles.

Total security!

## SECURITY

Do you want to be able to totally lock your garage door and gates when you go on holiday?

That's simple!

As the Somfy wall unit can control the door operation, the lighting and can then cut out the whole circuit to lock the door closed.

Leaving you to forget about locking up and enjoy the start of a great holiday!

Variety of handsets available

Garage door operator with battery back-up pack to enable operation in the event of a power cut

Multi-function wall mounted control unit

# Home Motion by Somfy

## SOMFY SOLUTIONS

The Somfy brand offers a virtually limitless number of solutions. Somfy motors and automatic control units can be adapted to fit any type of blind, awning, garage door or gate, regardless of the environment, the climate, the installation conditions or the number of safety devices required.

Home Motion by Somfy puts you in control.

## SOMFY RADIO CONTROL OPTIONS

Somfy can provide you with a control system to suit your lifestyle requirements. Whether you want to manually control your garage door or gate yourself, or leave the automatic controls to do the work for you, Somfy have the solution. The illustrations below simplify some typical garage door and gate applications together with potential controls solutions to provide you with your preferred system.
