

# Enhance your lifestyle

Solutions for roller shutters by Somfy

HOME  
MOTION BY

somfy®

Imagine ...

... a house that secures itself automatically!

Most people fit roller shutters to feel safe at night, to keep in the heat and save money through insulation, for softly lit comfort and dark rooms for undisturbed sleep ... But how many think that the shutters need to be manually opened in the morning and closed at night?

This is why motorising roller shutters is not a luxury, but time saved to do something more enjoyable.

Make opening and closing a comfort factor ... You can even programme the timer and never think about the shutters again!

# Enjoy life ... and let Somfy take control

## AUTOMATIC

Sleep on ... your centralised control is perfectly reliable. With Radio Technology Somfy™, you can close your shutters by pressing one button.

All of them – and none forgotten! But if you prefer automatic control, or floor by floor, that's possible too! A Somfy timer unit can even be programmed to open and close the shutters for you.

Simple solutions without wiring.

## PERFORMANCE

It all happens in a matter of seconds!

You will hardly have time to cross the garden or prepare yourself for a drive before the garage door has opened.

Due to the impressive range of \*Radio Technology Somfy™, you can open the garage door well before you have entered the drive!

Our radio systems use rolling code transmission technology with over 16 million combinations, providing you with safe and secure operation.

*\*Radio Technology Somfy™ (RTS) has a transmission range of 200m in free space or 20m through 2 concrete walls.*

## CONVENIENCE

Settle in and zap without moving!

Use your four channel remote control unit to close all the shutters at the rear of the property at once and then lower the side shutters when the sun is on the TV screen later on.

For total convenience, close all of the shutters, turn on the lamp and snuggle up for an evenings TV viewing – all at the touch of a button!

Timer unit with light sensor

Keyfob transmitter for operating a garage door roller shutter

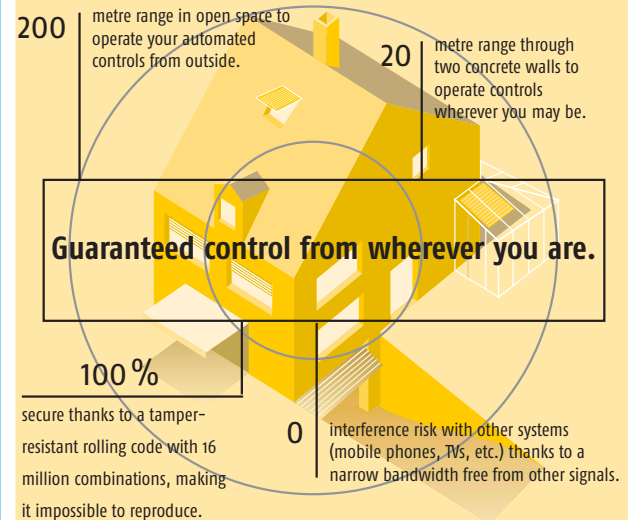

Single channel deluxe remote control with stylish table top holder

## SOMFY SOLUTIONS

The Somfy brand offers a virtually limitless number of solutions. Somfy motors and automatic control units can be adapted to fit any type of blind, awning, garage door or gate, regardless of the environment, the climate, the installation conditions or the number of safety devices required.

Home Motion by Somfy puts you in control.

## SOMFY RADIO CONTROL OPTIONS

Somfy can provide you with a control system to suit your lifestyle requirements. Whether you want to control your roller shutters yourself or leave the automatic controls to do the work for you, Somfy has the solution. The illustrations below simplify some typical roller shutter applications and some potential control solutions to provide you with your preferred system.

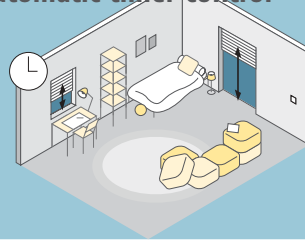

### Remote kefob control - roller shutter garage door

Keyfob remote

### Automatic timer control

Wireless timer unit
